

As I May FOH & LIGHTS

FOH

All vocals: delay and reverb (not too much)

Guitars: dry , pan 15% to L. And R

Bass: dry

Drums: reverb on snare and toms

(Of course every venue is different, so sound-engineer knows best)

Backing tracks:

-Backing track 1 (channel 15) is machines/instruments, it's very important that machine/instrument track comes out loud enough.

-Backing track 2 (channel 16) is back up vocals, volume of this track can be lower. (free hands for soundengineer =D)

LIGHTS

If we use our own lights , we need three-phase current minimum 16A (5 pin 16A plug) 220 V, (32A is better)

If we use house lights, we like white, blue and orange flashing lights and moving lights. Strobo and blinders is very okey for us!!! Smoke is nice too!!!
